

*Coffin & Casket Choices*

Independent Family Funeral Directors

Cornwall Funeral Services is proud to offer a large range of coffins. This allows our families the opportunity to select a fitting and individual coffin, or casket, for their loved one at this very difficult time.

We supply coffins or caskets made of solid wood, veneer, cardboard, willow, bamboo, wool, or metal. If you want a bespoke item we can provide almost any kind of coffin or casket you could want.

You may also want to think about how you would like your loved one to be dressed when they are resting. Many people supply us with a set of clothes but others prefer their loved one to wear a gown, which we can provide.

All our traditional coffins can be prepared with either brass or silver effect handles and wreath holders.

Our English Willow coffins are handcrafted by skilled workers with long family histories in willow weaving, using traditional methods. Willow has been grown on the Somerset Levels for centuries and has the unique ability to regenerate repeatedly from the same crown for 30 to 40 years. Once harvested it can grow back to the same height in a year, unlike the trees used in traditional coffin manufacturing which are cut down at a faster rate than they can regrow. Our English Willow coffins are available in either Round or Traditional styles and in a range of colours. Our standard colours are Brown, Green and Light with the colour variations achieved naturally by drying, boiling or stripping the bark.

The Cromer is a round ended coffin with gently tapered sides handcrafted from willow using traditional methods. Willow is a deciduous tree primarily found on most soil in cold and temperate regions of the Northern Hemisphere. Almost all willows take root very readily from cuttings taken from the original crown, or even where broken branches are left lying on the ground. Our Willow Cromer, Pod and Highsted coffins are manufactured in the EU using cottage industry methods, in which people work in their own homes and use their own equipment.

Our banana coffins are made from banana card, woven around a natural cane framework. Banana card is made using the dried woven leaves of the banana after the plant has produced its fruit and died back each year. Rattan is also woven into the coffin's design to create a striking contrast with the banana card's burnt golden appearance. Banana plants are often mistaken for trees as their main stem can reach a height of up to 8 metres; but they are in fact the world's largest known herb. The stem is not made of wood, but tightly coiled leaves. All of our banana products are made in World Fair Trade Organisation accredited workshops.

**Round**

**Traditional**

*Banana Leaf*

Our Pandanus coffins are made from the leaves of a prolific wild plant which grows rapidly in the watery environments of Southeast Asia and is cultivated as a highly renewable and sustainable material. The leaves are dried and then spun into long yarns which are then woven and coiled around a natural cane framework. Rattan is also woven into the coffin's design to create a striking lightweight contrast against the leaf yarn's silvery appearance. Our Pandanus coffins are manufactured in Indonesia in only World Fair Trade accredited workshops.

These caskets are made from a variety of materials, all chosen for their low impact on the environment. Our models Ebony and Cerise achieve their striking look through a combination of bands of banana, pandanus and rattan, here dyed in red or black. These two models are made in World Fair Trade accredited workshops. Pine is a casket made from sustainable pine with a smooth surface, unwaxed and untreated, allowing the natural grain to be seen at its best on a gently curved lid.

**Banana Ebony**

**Pine**

The Bamboo Lattice coffin is constructed of two different layers of woven bamboo which gives it a distinctive and unique appearance. A criss-cross pattern of stripped bamboo bark covers an intricately woven layer of soft bamboo creating a striking contrast. Bamboo is the fastest growing plant on the planet; it grows up to a metre per day and absorbs more CO<sub>2</sub> for its weight than any other plant. All our bamboo products are made in World Fair Trade Organisation accredited workshops.

*Bamboo Lattice*

**Round**

**Traditional**

A beautifully crafted bamboo coffin woven from sustainable split bamboo, manufactured in China. The coffins are handmade and 100% bio-degradable with no nails, screws or glues used during manufacture. The species of bamboo *Phyllostachys Pubescens* does not form any part of the Chinese panda's diet and they do not live in Hunan Province where the company is located.

Our coffins can be custom sprayed to any colour of your choosing to create a colourful, individual tribute to a loved one. We use only environmentally friendly, advanced water-based paints which provide a smooth, satin finish coat alongside a great range of colours to choose from. We can create combinations of colours to produce flag colours, football team kit colours, regimental colours, club colours or anything else that could bring a unique and fitting personal touch to a coffin.

Some of the most popular colours are featured below.

# Coloured Coffins & Colour Range

## Colour Range

Our cardboard coffins are manufactured in the UK from corrugated cardboard materials produced from unbleached pulp containing a minimum of 80% recycled paper and wood pulp sourced from sustainable forests. They are 100% biodegradable and cremate with 90% lower carbon emissions than a standard chipboard or MDF coffin. The cardboard is folded in such a way that the structure is multi-layered and incredibly strong; they can support a weight of over 23 stone (146kg). Only natural corn starch-based glues are used in their construction. Each comes with six natural cotton rope handles.

**Manilla**

**White**

**Woodgrain**

*Cardboard Coffins*

Burial shrouds have been used for centuries, made from materials such as wool, hemp, flax and even silk. Our bamboo shrouds are made from tightly woven, unbleached bamboo yarn, a highly sustainable and renewable material. The willow stretcher is made with dark barked willow which gives it a rustic, earthy appearance. 100% bio-degradable, the shroud and stretcher are ideal for natural burial but are also suitable for every type of funeral services including cremation.
